Comment #1 from Philip Withnall ([points: 20](#))

2007-09-02 00:29 UTC [[reply](#)]

Thanks for taking the time to report this bug.
Unfortunately, that stack trace is missing some elements that will help a lot
to solve the problem, so it will be hard for the developers to fix that crash.
Can you get us a stack trace with debugging symbols? Please see
<http://www.gnome.org/projects/totem/#bugs> for more information on how to do so
and reopen this bug or report a new one. Thanks in advance!

Comment #2 from Dirk Sohler ([points: 2](#))

2007-09-05 19:50 UTC [[reply](#)]

I'm sorry for your bug, pal... But WTF is "extremely perverted animal sex porno"? If you do a bugreport next time, reproduce it with a fresh instance and cleared cache :)

Comment #3 from Philip Withnall ([points: 20](#))

2007-09-05 22:04 UTC [[reply](#)]

(In reply to [comment #2](#))

```
> I'm sorry for your bug, pal... But WTF is "extremely perverted animal sex
> porno"? If you do a bugreport next time, reproduce it with a fresh instance and
> cleared cache :)
```

Our concern is not what the bug reporter is watching; we just want to fix the bug. Please stay on topic, and don't comment if you don't have something useful to add. ;-)

(Sorry for bugspam about bugspam.)
